

gLatex

Adhesion promoter for cement mortars and shaving
on surfaces with difficult adhesion

METHOD OF USE

gLatex is an aqueous dispersion of synthetic elastomeric polymer, which added to cementitious mixtures improves its workability, resistance to bending and abrasion for screeds, plasters, low thickness shaving agents, etc. For cement grouts, The product must be applied before the casting of adherent screeds or shaving on old concrete surfaces.

WARNINGS

Keep the product in containers tightly closed, in a dry, ventilated and with room temperature ≥ 5 °C.

*The above information is to be considered indicative, non-binding and subject to change without notice.
Therefore the suitability of the product for the desired result must be verified by the user, who is fully responsible for its use.*

PACKAGING

Bin of 5 Lt.
